Prepared by: Padmashree T.G.K. Menon & Dr. O.N.Solanki

Instructions:

1. Crop sown in Moon opposite to Saturn day strengthens the plant to the extent that it can resist plant disease and certain insect and pest resulting in lesser damage to the crop. Spray BD 501 early in the morning on crop.
2. In ascending period of moon harvest crops except Root crops, Cut bud sticks for grafting, Spray BD 501 early in the morning on crop.
3. In descending period of moon cultivate soil, make and spread compost, prune all fruit trees on fruit days and flower plants / shrubs on flower days, harvest root crops, spray BD 500 in the evening on soil.
4. Dates shown in Moon opposite to Saturn and 48 hr before Full moon are good for all crops but dates shown in Moon in zodiac constellations are also good according to crops category.
